Time registration the way you like

Both realtime registration via stopwatch and afterwards via the toolbar and calendar, up to the minute if you wish.

Direct insight at every companylevel

Answers the time related questions of your organization in a snap.

All tools in one product

Perfect for screenworkers and employees in the field, all seamlessly integrated.
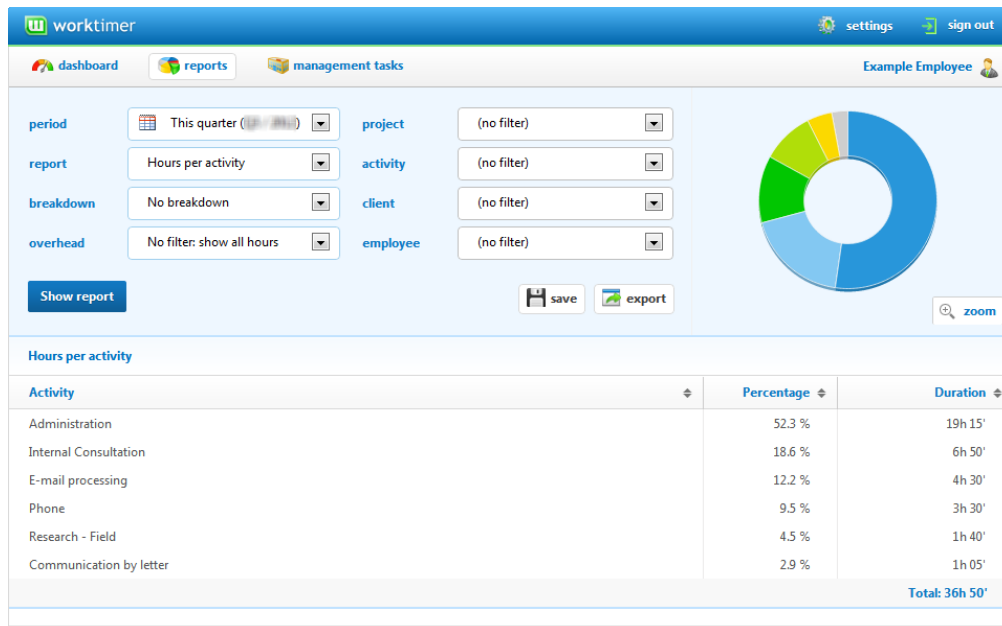

On any platform

Via internet, the toolbar software or using your Phone. For Windows and MacOS platform.

All the benefits of cloud software

Simple implementation; no server required.

worktimer

Our solution

Time registration is a necessary evil for many employees. For the manager though, it is of vital importance. WorkTimer lowers the timesheet-threshold for both the employee and for you as a manager.

Make better decisions

Based on current facts and figures, not on assumptions.

Direct insight

The information just registered by the employee is available for immediate analysis.

Discover inefficiencies

Get insight into your workload, billable versus non billable hours, sick leave and other costs.

Questions? Answers!

You can analyse your hours at any time; answering the questions that live within your organization.
Report

On all levels: company, department, project, client, employee and activity level.

Methods

With WorkTimer your are not bound to one specific method or timesheet. In real life, every employee has his or her favourite method. This was one of the starting points during the development of WorkTimer.
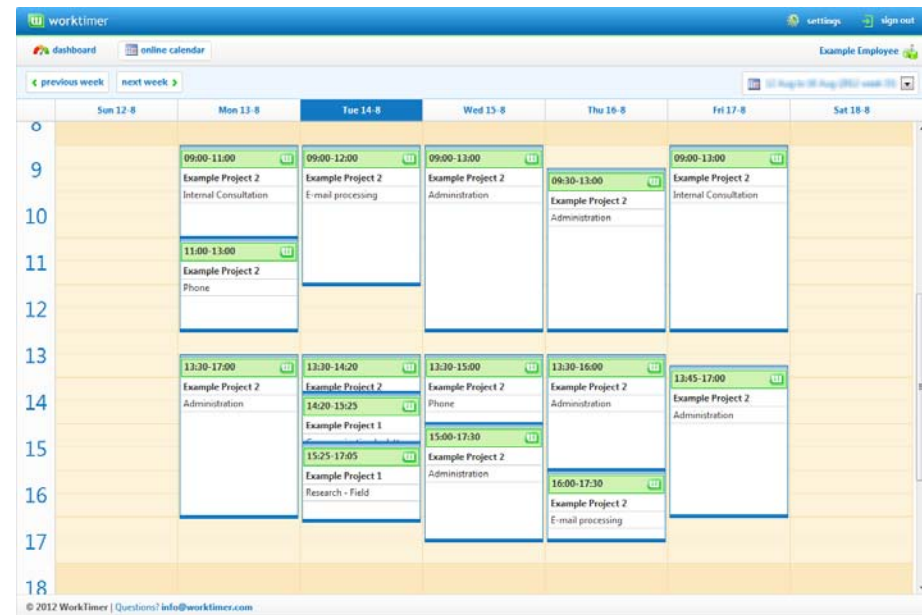

Toolbar software

WorkTimer is visible as a toolbar in the employees' screen. This toolbar can be installed on both Windows and Mac OS computers. The toolbar helps the employee register his/her work time and makes it available to the management. Because this happens during the day, real-time, employees no longer have to fill in any timesheets or Excel forms at the end of the day.

The WorkTimer toolbar in Windows environment

Online Calendar

Your employees can use our online calendar to record their work time in a visually attractive way. Besides that, the calendar provides insight into previously recorded hours. The calendar works just like Outlook or Google Calendar, and is easy to get familiar with.
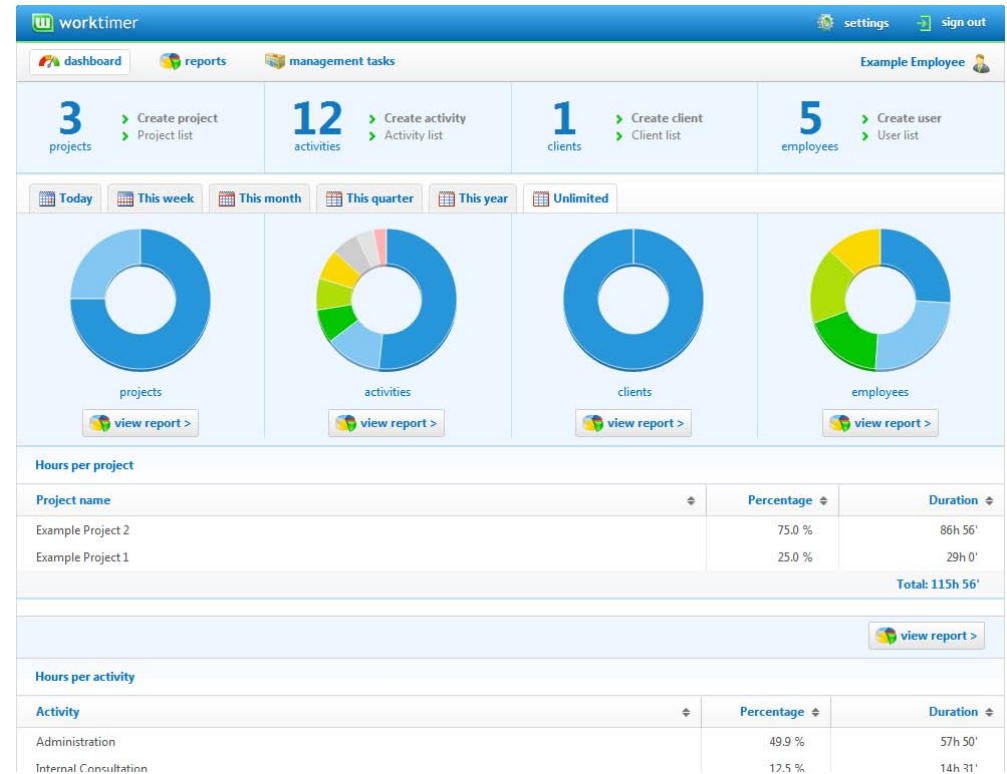

worktimer

Mobile phone

WorkTimer mobile allows your employees to record their project hours, regardless of their location, whether via the stopwatch method or via manual input. No additional software is needed on the device. The web application is suitable for all modern devices with a web browser (e.g.: iPhone, Android, Blackberry, and Windows).

Management Module

All collected information is accessible in the WorkTimer Management Module. Regardless the method of time registration that had been used. This module allows you to create reports or add new projects and employees.

worktimer

Pricing & Editions

WorkTimer is available in two editions: Small Business and Business. These editions are fine-tuned to fit exactly to your company size and its specific needs.

WorkTimer Small Business

- Up to 20 employees
- Everything you need
- Minimum contract 1 year
- No unnecessary modules

€ 12,50

per employee per month (max 20 users)

Why different editions?

The toolbar software is used for both editions. WorkTimer Business comes with additional tools for larger organizations. These tools unnecessarily complicate WorkTimer for small organizations. For example, you can add your departments to WorkTimer to add more details to your time tracking.

WorkTimer Business

- From 20 employees
- Extra management tools
- Minimum contract 1 month
- Working with departments

From € 4,-

per employee per month (100 users)

More licences, lower monthly fee

We apply special, **lower**, prices for larger quantities of licenses. Please contact us to request a quote.

References

WorkTimer is currently used by approximately 60 organizations of all sizes. Both nation-wide operating and middle size companies are are attracted to our solution. This page contains a list of customers for which WorkTimer works.

Monuta
Funeral Caring organization

"The 500 funeral attendants at Monuta register their hours using WorkTimer. WorkTimer offers an accessible tool for time recording in our rather 'offline' sector. "

Çetin Gokhan, Monuta

Hamaka
Webdesign company

"Thanks to WorkTimer Hamaka has a better view of the time spent on each project, but also for specific activities. We now make offers based on our experiences in the past, creating more realistic offers."

Bauke Zwaan, Hamaka

Altenburg & Wymenga
Ecological research agency

"WorkTimer provides us insight in the booked hours per project, per employee and per type of work in any given period, so WorkTimer is used by the management as a steering instrument."

Harmanna Groothof, Altenburg & Wymenga

Sectors

WorkTimer is suitable for recording all types of work. To date, however, most of our customers are active in the following sectors:

- Healthcare
- Consulting
- Accounting
- Advertising
- Web design

worktimer

Solve your time tracking issues in an instant

WorkTimer is the **complete** solution to recording project hours for your organization.

Flexible

WorkTimer is flexible. You can choose to register your hours using the intuitive WorkTimer toolbar, the web, the WorkTimer Calendar or even your mobile device. This can be either real-time (stopwatch) or via manual time registration. The choice is yours!

Extensive reports

WorkTimer can report in both hard numbers and graphical charts. Because of the extensive export functions (PDF, XLS, and CSV) WorkTimers information can be part of any report or presentation.

Simple

WorkTimer does not dictate one specific method of time recording. WorkTimer was created to fit your own work processes and is therefore easy to use: for you *and* your employees. WorkTimer time registration fits perfectly with your organization's characteristics.

Active Budget Control

WorkTimer allows you to actively monitor your budget. You can set up WorkTimer so that you receive a text or e-mail message if a project exceeds its budget. That way, WorkTimer proactively keeps you informed.

Understanding your business

WorkTimer gives you access to your statistics at any time, at any level. Reviewing project progress or the division of hours between activities is just one click away. Press the button, WorkTimer reports.

Easy installation

WorkTimer operates entirely online and runs on our servers. We take over the process of maintenance, creating backups and installing updates. This lets you use the most recent version of WorkTimer without any extra effort.

Contact us

Are you interested in online time tracking using WorkTimer? Please don't hesitate to contact us if you have any questions or remarks. Our office is based in Europe (The Netherlands). Please be aware of time difference when you try to reach us by phone.
